Hiring Manager

Cyberhawk Innovations Ltd.
EICA Ratho, 5th Floor
Edinburgh EH28 8AA

Dear Hiring Manager,

I am writing to express my keen interest in the Machine Learning Engineer - Computer Vision position at Cyberhawk. With over three years of experience as a Computer Vision engineer and a strong background in leading technical teams, I am excited about the opportunity to contribute to Cyberhawk's mission of delivering actionable insights through innovative drone-based inspections and visual data management solutions.

In my previous roles with companies in India and the Sultanate of Oman, I led the development and deployment of machine vision systems for clients including a Tier 1 construction company in Austin, Texas, and a UK-based Oil & Gas enterprise operating in Oman. My responsibilities encompassed overseeing the business logic, leading client meetings, and engaging directly with end-users—often in challenging environments—to understand their pain points and tailor solutions accordingly.

At LivNSense Technologies, I progressed from an AI Vision Intern to Lead Software Engineer - AI, spearheading our primary machine vision program. This role involved designing inference pipelines, deploying models across vehicle fleets from Bengaluru to Austin via Microsoft Azure, and ensuring ongoing model maintenance. Similarly, at Esbaar, I not only managed technical deployments but also conducted on-site user interactions to refine our solutions based on real-world feedback.

Cyberhawk's commitment to safety, innovation, and sustainability resonates deeply with my professional ethos. The company's pioneering use of drones to remove personnel from hazardous inspection tasks and its dedication to reducing environmental impact align with my experiences and aspirations.

I am particularly impressed by Cyberhawk's iHawk™ platform, which provides a single source of truth by integrating diverse visual data to enhance situational awareness and decision-making. My experience in developing and deploying

scalable computer vision solutions positions me well to contribute to the continued advancement of such platforms.

Moreover, my background in collaborating with cross-functional, multinational teams—from product development to sales and executive leadership—has honed my ability to navigate complex project landscapes and drive initiatives from conception to execution. I have also taken pride in mentoring junior team members, fostering a culture of continuous learning and innovation.

I am enthusiastic about the prospect of joining Cyberhawk's dynamic team and contributing to its mission of delivering safer, smarter, and more efficient infrastructure solutions. I look forward to the opportunity to discuss how my skills and experiences align with your needs.

Thank you for considering my application.

Sincerely,
Dexter Fernandes
