

UWE Bristol - Degree Classification Estimator: Masters Degrees

PLEASE READ THIS GUIDANCE BEFORE USING THE CALCULATOR

The calculator, available on the Calculator tab, is designed to work for Masters Degrees comprising 180 credits assessed under the university's standard regulations. The calculation uses the best 120 credits worth of marks from the 180 credits.

If you do not have all your marks yet, you can still use this calculator with marks you hope to achieve in those modules to estimate your outcome.

You can view a completed example calculator in the Example tab.

IMPORTANT NOTES

1. Any outcome that you calculate is based solely on your selection of marks, and the University will not be bound by any calculation that you create.
2. The academic record system calculates using unrounded marks. However, the marks you see on myUWE are rounded up or down to the nearest whole number. This means there is normally a slight difference between your estimate and your actual final outcome. In some cases this can be the difference between two classifications.
3. Always consult your Programme Specification to identify if your programme is assessed to standard regulations or if you have any variant regulations (which may be the case if your programme is professionally accredited). Variant regulations could mean that your degree is calculated in a different way.

If you have any problems using this resource, please contact a Student Support Adviser in the first instance via an InfoPoint.

Degree Classification Estimator: Master

Follow the steps below to calculate an estimate of you

Masters Calculator

Step 1: Enter each module's name for your best 120 credits, starting with the module you achieved your highest mark for and continue down until you reach your lowest. Please note: Only Level 7 modules count towards your classification calculation. Please do not enter any Level 6 modules.	Step 2: Enter the number of credits the module is worth. (shown at the end of the module code and module specification e.g 15/30/45)	Step 3: List your overall module mark here. If the module outcome was Pass (and not a mark), please leave this blank.
Module Name	Module of Credits	Module Mark
Robotic Systems	20	62
RRTM	20	81
MV	15	67
RF	15	67
HRI	15	77
AR	15	58
IIS	10	72
SR	10	67

Estimated Outcome

Based on your marks above, your estimated overall mark is:	69.04
Your estimated degree outcome is:	Merit

rs Degrees

ur final outcome

Step 4: Number of credits to include in calculation. Enter all the credit from the module, unless it is greater than the number of credits remaining (see next column). If it is greater, enter the number of credits remaining	Step 5: Credits Remaining. (stop entering modules when you get to 0)
Credits to Include	Credits Remaining
20	100
20	80
15	65
15	50
15	35
15	20
10	10
